Mr. Moore, this acknowledges and follows up on your "Ask Tdec" inquiry of March 26, below regarding dirt hauling at the Eagle View CAFO. Division staff have investigated the activity and determined that both the mortality management and the litter de-caking of the houses is being conducted consistent with agricultural practices incorporated into the facility's nutrient management plan and that the activities are not a violation of the sewerage system requirements of the facility's coverage under the state's General State Operating Permit for Concentrated Animal Feeding Operations, SOPC00118.

The division appreciates your concern for water quality and the timely opportunity to investigate these activities.

Wade Murphy

Good morning,

This e-mail was submitted to Ask.Tdec. Please review and respond appropriately for the Department.

Be sure to copy Ask.Tdec on your response and include AskTDEC Request ID 56728 in the subject line.

Thank you,
Ask.TDEC

Good day, Eagle View CAFO maybe up to illegal activity...They are hauling large amount of dirt out of the buildings...We believe that the birds were in the house only 3 weeks & became diseased or something...Our neighbors are concerned they are up to no good and may be hiding their activities...I have pics. also of large trucks & a conveyor belt system to load the trucks...If so where are they dumping the dirt?
